

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### **Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

THE following pages have been compiled in order to supply the desideratum of a *Hindī* Grammar in the *Devanāgarī* character, and to obviate the necessity of studying the parts of speech in a different character from that employed in the books used for translation at the East-India College. An outline of the *Braj Bhākhā* has been given, as the forms of this dialect occur frequently in the *Prem Sāgar* and other standard works of Hindī literature. These pages are designed, not to supersede, but to serve as a convenient introduction to the more copious "*Hindustānī* Grammar" of Mr. Shakspeare.

In representing the Oriental sounds in English letters, the system of Sir William Jones has been employed, not because it was deemed the best in itself, but because it was necessary to observe uniformity in this respect with the works to be used in connexion with this. The vowels must, therefore, be pronounced as follows: *viz.*, *a* as the *u* in *but*; *ā* as in *hall*; *i* as in *bit*; *ī* as *ee* in *seen*; *u* as in *bush*; *ū* as in *rule*; *e* as in *there*;

*ai* as the *i* in *ride* ; *o* as in *so* ; *au* as *ou* in *our*. The consonants must receive their usual English sounds, except that in the case of *th* and *ph* the compound must be sounded as in the words " *pothook*" and " *haphazard*," not as in " *this*" and " *philology*."

# HINDĪ AND BRAJ BHĀKHĀ GRAMMAR.

## PART FIRST.

### CHAPTER I.

#### OF THE ALPHABET.

1. THE *Devanāgarī* alphabet, in which the Hindī language is generally written, consists of fifty letters. It is read, like English, from left to right, and is as follows :—

#### *Vowels.*

अ *a*, आ *ā*, इ *i*, ई *ī*, उ *u*, ऊ *ū*, ऋ *ri*, (ॠ *rī*), (ऌ *lri*), (ॡ *lri*),  
ए *e*, ऐ *ai*, ओ *o*, औ *au*, . *ni*, : *h* (final and silent).

#### *Consonants.*

Gutturals	क <i>ka</i> ,	ख <i>kha</i> ,	ग <i>ga</i> ,	घ <i>gha</i> ,	(ङ <i>nga</i> ).
Palatals	च <i>cha</i> ,	छ <i>chha</i> ,	ज <i>ja</i> ,	झ <i>jha</i> ,	(ञ <i>nya</i> ).
Cerebrals	ट <i>ṭa</i> ,	ठ <i>ṭha</i> ,	ड <i>ḍa</i> ,	ढ <i>ḍha</i> ,	ण <i>ṇa</i> .
Dentals	त <i>ta</i> ,	थ <i>tha</i> ,	द <i>da</i> ,	ध <i>dha</i> ,	न <i>na</i> .
Labials	प <i>pa</i> ,	फ <i>pha</i> ,	ब <i>ba</i> ,	भ <i>bha</i> ,	म <i>ma</i> .
Semivowels	य <i>ya</i> ,	र <i>ra</i> ,	ल <i>la</i> ,	व <i>va</i> , or <i>wa</i> ,	
Sibilants and Aspirate	श <i>sa</i>	ष <i>sha</i> ,	स <i>sa</i> ,	ह <i>ha</i> ,	क्ष <i>ksha</i> .

The letters enclosed in brackets will seldom or never be met with in *Hindī*. The *cerebral* letters are pronounced by turning and applying the tip of the tongue far back against the palate. The sound is termed *cerebral*, because it appears to come from the head. The sounds to which the English letters in the above scheme are restricted, have been explained in the Introduction. The cerebral letters ढ *ḍa* and ढ्ह *ḍha*, when medial or final, are commonly pronounced *ṛa* and *ṛha*. A point may be placed under the character to indicate that this pronunciation is intended. The sound of the letter ण\* *ṣa* is generally corrupted into *ṣha*; that of ष *sha* into *kha*, and of ष्ह *ksha* into *chha*.

2. The above forms of the *vowels* are used only at the beginning of a syllable. The vowel अ *a* is inherent in every consonant, and is sounded after every one † which has not the mark of elision ‡ (*viz.* ॣ) subscribed, nor another vowel attached to it. These other vowels, when not at the beginning of a syllable, assume the following contracted shapes.

*Medial and Final forms of the Vowels.*

। ā, । i, । ī, ॣ § u ॣ § ū, ॣ ri, ( ॣ rī), ( ॣ lri), ( ॣ lrī), ˘ e, ˘ ai,  
। o, । au.

\* Written also thus, ण.

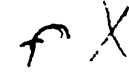

† Except the last in a word.

‡ The mark of elision is not invariably supplied either in manuscripts or in printed books. But for this neglect, such is the perfection of the alphabet, that no room is left for doubt respecting the pronunciation of a word.

§ These vowels are added to the letter र, thus, र ru; र ū.

*Example of the Vowels following the letter क ka.*

क *ka*, का *kā*, कि *ki*, की *kī*, कु *ku*, कू *kū*, कृ *kri*, के *ke*, कै *kai*,  
को *ko*, कौ *kau*, कं *kan*, कः *ka*.

It will be observed that the third of the vowels, viz. *इ i*, is written *before* the consonant which it follows in pronunciation. This form of *इ* is 

The mark (◌), termed *anuswāra*, has generally in Hindī, the sound of the nasal *n*\* in *king*. The silent aspirate (◌:) is termed *visarga*.

3. When two or more consonants meet, without the intervention of a vowel, they coalesce and become one compound character. These compounds are formed by writing the subsequent consonant under the first, by blending them in a particular way, or by writing them in their usual order, omitting the perpendicular stroke of each letter except the last. The letter *र ra*, when it immediately precedes a consonant, is written above it in the form of a crescent, thus, *र्ग rga*; when it immediately follows one, it is written beneath it, thus, *क्र kra*, *ग्र gra*.

The marks ॥ and ॥ serve to divide hemistichs and distichs, and occasionally to indicate other pauses in the composition.

---

\* It assumes the pronunciation of the nasal proper to the character which it precedes, taking for example the sound of *m* before a *labial*, as in चंपक *champak*, a tree so called.

The following are among the most useful of the

*Compound Letters.*

क *kka*, क्क or क्क *kta*, कम *kma*, क्य *kya*, क्ष *ksha*,\* ग्न *gna*, ग्व *gwa*, च *chcha*, च्छ *chchha*, ज्ञ *jnya*† (compounded of ज *ja* and न्य *nya*), ण *ṇna*, त्त *tta*, त्तम *tma*, त्य *tya*, त्र *tra*, द्द *dda*, द्ध *ddha*, द्म *dma*, द्य *dya*, द्र *dra*, द्व *dwa*, ध्न *dhna*, न्त *nta*, न्म *nma*, ब्र *bra*, म्प *mpa*, ल्ल *lla*, व्र *vva*, श्र *shra* (compounded of श *ṣa* and र *ra*), श्त *shṭa*, श्न *shṇa*, स्र *sra*, स्त्र *stra*, ह्र *hri*, ह्न *hma*, ह्य *hya*.

The student will meet with few compound characters which the foregoing instructions do not furnish him with the means of readily analysing. Some peculiar forms, however, occur in books printed in India, which we do not possess types to represent. These forms will be found in a lithographic plate at the end of the volume.‡

4. The following extract from a Hindī work, accompanied by a literal transcript in our own letters, may serve as an

*Exercise in reading the Devanāgarī character.*

*rājā ab maini Ugrasen ke bhāī Devak kī kathā kahtā hūn*

\* Pronounced *chha*.

† In common pronunciation, *gya*.

‡ In words borrowed from the Arabic and Persian, letters occur which have none exactly corresponding to them in the Devanāgarī alphabet. To represent these, the characters which approach nearest in pronunciation are employed, and points may be subscribed to indicate the extraordinary use made of them.

## CHAPTER II.

### *Of the Noun.*

5. IN the Hindī there are two numbers, singular and plural ; and two genders, masculine and feminine.†

---

\* When following a vowel, य *ya* and व *va* are frequently used for ए *e* and ओ *o*. Ex. होय *hoe*, पाय *pae*, बिलाव *bilao*.

† What is here and elsewhere said of the Hindī, generally applies equally to the kindred dialect, the *Braj Bhākhā*. In the declensions and conjugations, the forms peculiar to the latter will be exhibited in parallel columns with the Hindī.

Names of males are masculine, and of females feminine.

Nouns ending in अः *a*, आ *ā*, or आं *āni*, are generally masculine; those ending in ई *ī*, or ईं *īni*, or the consonants त *t*, ष *sh*, or न *n*, are generally feminine. There are many exceptions, however, to this rule, the distribution of genders being very arbitrary.

6. Declension is effected by means of particles placed *after* the word, and hence termed *postpositions*. These postpositions occasion certain changes in the terminations of words. This change is technically termed "*inflection*," and the form of the word thus modified is called its "*inflected form*." For the purpose of declension, nouns may be conveniently divided into two classes; the first containing such masculines as end in अः *a*, आ *ā*, and आं *āni*; and the second comprising all the other words in the language.

6. The word बेटा *a son*, may serve as an example of the

FIRST DECLENSION.

बेटा *a son*.

SING.	PLUR.
Nom. बेटा <i>a son</i> .	बेटे <i>sons</i> .
Gen. बेटे का, *के or की <i>of a son</i> .	बेटों का, के, की <i>of sons</i> .
Dat. बेटे को † <i>to a son</i> .	बेटों को <i>to sons</i> .

\* The rule for the use of the three postpositions of the genitive will be given hereafter.

† Or के तई.

SING.	PLUR.
Ac. बेटे को * <i>a son.</i>	बेटों को <i>sons.</i>
Voc. हे बेटे <i>O son!</i>	हे बेटो <i>O sons!</i>
Abl. बेटे से <i>from a son.</i>	बेटों से <i>from sons.</i>

Nouns in आं *āni* may be declined like the above, or they may retain the nasal in the inflected form of the singular, after changing the आ *ā* to ए *e*.

7. In the following example the *Braj Bhākhā* forms are given in parallel columns with the Hindī. The word पुरुष *a man* (as it ends in neither *a*, *ā*, nor *āni*), differs from बेटा in undergoing no inflection in the oblique cases of the singular, nor in the nominative plural. It belongs to the

SECOND DECLENSION.

पुरुष *a man.*

SINGULAR.

<i>Hindī.</i>	<i>Bhākhā.</i>
Nom. पुरुष	पुरुष <i>a man.</i>
Gen. पुरुष का, के, की	पुरुष को, के, की <i>of a man.</i>
Dat. पुरुष को	पुरुष कोँ <i>to a man.</i>
Ac. पुरुष को	पुरुष कोँ <i>a man.</i>
Voc. हे पुरुष	हे पुरुष <i>O man!</i>
Abl. पुरुष से	पुरुष सेँ † <i>from a man.</i>

\* Or के तई.

† Or तैं.

## PLURAL.

<i>Hindī.</i>	<i>Bhākhā.</i>
Nom. पुरुष	पुरुष <i>men.</i>
Gen. पुरुषों का, के, की	पुरुषनि* कौ, के, की <i>of men.</i>
Dat. पुरुषों को	पुरुषनि कौं <i>to men.</i>
Ac. पुरुषों को	पुरुषनि कौं <i>men.</i>
Voc. हे पुरुषो	हे पुरुषो <i>O men!</i>
Abl. पुरुषों से	पुरुषनि सौं <i>from men.</i>

8. Feminine nouns in Hindī differ from masculines of the second declension in the nominative plural only. Those not ending in ई *ī* take एं *enī* in the nominative plural, as बातें † *words*, from बात. Those ending in ई *ī* change that termination to इयां *iyānī* in the nominative plural. In the Bhākhā a nasal only is added. Example:

पुत्री *a daughter.*

## SINGULAR.

<i>Hindī.</i>	<i>Bhākhā.</i>
Nom. पुत्री	पुत्रो <i>a daughter.</i>
Gen. पुत्री का, के, की	पुत्री कौ, के, की <i>of a daughter.</i>
Dat. पुत्री को	पुत्री कौं <i>to a daughter.</i>
Ac. पुत्री को	पुत्री कौं <i>a daughter.</i>
Voc. हे पुत्री	हे पुत्री <i>O daughter!</i>
Abl. पुत्री से	पुत्री सौं <i>from a daughter.</i>

\* Or पुरुषन .

† The Bhākhā form is बातें .

## PLURAL.

<i>Hindī.</i>	<i>Bhākhā.</i>
Nom. पुत्रियां	पुत्रीं <i>daughters.</i>
Gen. पुत्रियों का, के, की	पुत्रीन*कौ, के, की <i>of daughters.</i>
Dat. पुत्रियों को	पुत्रीन कौं <i>to daughters.</i>
Ac. पुत्रियों को	पुत्रीन कौं <i>daughters.</i>
Voc. हे पुत्रियो	हे पुत्रियो <i>O daughters!</i>
Abl. पुत्रियों से	पुत्रीन सौं <i>from daughters.</i>

9. Some masculine nouns in आ *ā* undergo no change in the nominative plural, nor in the oblique cases of the singular. They are therefore of the second declension. Ex. पिता *a father*; पिता से *from a father*; पिता *fathers*; पिताजों से *from fathers*. The words राजा *a king*, बाबा *a father*, गदा *a beggar*, and several others are thus declined.

10. Words of two short syllables, with the vowel अ *a* in the second, drop that vowel when a termination beginning with a vowel is added. So बरस *a year*, becomes in the accusative plural बसों को.

## CHAPTER III.

*Of the Adjective.*

11. ADJECTIVES, when employed as concrete nouns, are declined like nouns. When they agree with a noun they undergo

---

\* Or पुत्रियन .

no inflection, unless they end in आ. Adjectives ending in आ change\* this termination to ए when the noun is masculine, and in any other case than the nominative singular; and to ई if the noun be feminine. The postposition of the genitive (*viz.* का) varies its termination, exactly like an adjective, to agree with the word which governs the genitive. This, as well as the comparison of adjectives, will be illustrated in the Syntax.

---

## CHAPTER IV.

### *Of the Pronouns.*

12. THE declension of the pronouns does not differ very much from that of the nouns.

## CHAPTER V.

*Of the Verb.*

13. IN Hindī there is but one conjugation. The second person singular of the imperative is the root, from which all the other parts of the verb are derived. Besides the infinitive, there are three participles, six past tenses, five present, two future, and the imperatives, common and respectful.

The infinitive is formed by adding न् to the root;\* the past participle by adding आ; the present by adding ता; and the past conjunctive (which means “having done so and so”) is

\* The preliminary remarks on the verb apply more particularly to the *Hindī*; the peculiarities of the *Bhākhā* being postponed, in order to avoid embarrassing the learner. Those parts of the verb which end in आ, vary the termination like adjectives (analogously to the Latin participles in *us*) so as to agree with the nominative. This will be further explained in the Syntax.

either the same as the root, or is formed by adding one or other of the terminations ए, के, कर, कर्के, or कर्कर.

The simple, or indefinite, past tense is the same as the past participle. The compound past tenses are formed by subjoining to this, in succession, the five tenses of the auxiliary verb.

The simple, or indefinite, present tense is the same as the present participle. The compound present tenses are formed by subjoining to this, in succession, the four first tenses of the auxiliary verb.

The aorist (or indefinite future) is formed by adding the following terminations :

SING.			PLUR.		
1st Person.	2d.	3d.	1st Person.	2d.	3d.
हुं	ए	ए	एं	ओ	एं

The future is formed from the aorist, by adding the syllable गा.

The imperative is the same as the aorist, except in the second person singular, which (as before-mentioned) is the *root* of the verb.

The respectful and precative forms of the future and imperative are formed by adding इये, इयेगा, and इयो.

#### *The Auxiliary Verb.*

14. The defective auxiliary (which, when uncombined with a participle, is employed as the substantive verb *to be*), is as follows :

(1.) *Past Tense.\**

SING.		PLUR.	
<i>Hindī.</i>	<i>Bhākhā.†</i>	<i>Hindī.</i>	<i>Bhākhā.</i>

तू होवे or होय ‡ or हो	होय <i>thou mayest be.</i>
वुह होवे or होय or हो	होय <i>he may be.</i>

\* The tenses are arranged in the natural order of past, present, and future.

† The *Bhākhā* pronouns are omitted. They may be supplied by referring to the preceding chapter.

‡ होय is pronounced *ho-e*; होयं *hoen*; and हौय *haune*.

## PLURAL.

<i>Hindī.</i>	<i>Bhākhā.</i>

वे होते <i>they become.</i>	होत or होते <i>they become.</i>

This auxiliary, when combined with a past participle, is translated by the verb *to have*; and when combined with a present participle, it is translated by the verb *to be*.

15. The verb चल *go*, may serve as an example of a perfectly regular verb. The few irregularities occurring in certain other verbs, will be noticed in the sequel.

16. The passive voice is formed by conjugating the verb जाना *to go*, with the past participle. As it presents no other inflections than those of the active voice, its further consideration is referred to the Syntax.

## CHAPTER VI.

*Of Particles.*

17. UNDER this head may be classed, the Postpositions, Adverbs, Conjunctions, and Interjections. With the exception of the postposition employed in forming the genitive case, these words are subject to no change of form ; their consideration belongs, therefore, to the second part of this work.

\* The *Bhākhā* form चलियो *ye shall go, or may ye go*, is restricted to the second person plural.

END OF PART FIRST.

## PART SECOND.

## OF THE SYNTAX.

## CHAPTER VII.

*Syntax of the Noun.*

18. THE general rule for the order of a sentence in Hindī, is to begin with the nominative, and end with the verb. In books where no stops are used, the uniformity of this arrangement prevents, in a great measure, the ambiguity and inconvenience which might be expected to arise from their omission. In these remarks on the Syntax of the Hindī, we shall confine our attention to those points in which it differs from that of other languages, with which the reader is presumed to be already conversant. In regard to the noun, therefore, we need only notice the peculiar construction of the genitive case. The postposition का, which is the sign of this case, varies its termination, to agree with the word which *governs* the genitive. If this governing word be a masculine in the nominative singular, का is used; if masculine, but *not* nominative singular, के; and if feminine, की. Examples: राजा का बेटा *the son of the king*: राजा के बेटे से *from the son of the king*: राजा के बेटे *the sons*

*of the king* : राजा के बेटों से *from the sons of the king* : राजा की बेटी *the daughter of the king* : राजा की बेटियों से *from the daughters of the king*. The Bhākhā postpositions कौ, के, की, follow the same rule.

---

## CHAPTER VIII.

### *Syntax of the Adjective.*

19. ADJECTIVES ending in आ\* vary the termination to agree with the noun, on the same principle as the postposition का, above explained. Examples: एक काला घोड़ा *a black horse* : एक काले घोड़े पर *on a black horse* : काले घोड़े *black horses* : एक काली घोड़ी *a black mare* : काली घोड़ियां *black mares*.

20. Adjectives ending in any other termination than आ, undergo no alteration, whatever be the gender or number of the noun with which they are in construction.

21. The adjunct of similitude, सा *like*, varies its termination like an adjective. It is frequently added to an adjective, sometimes giving increased emphasis, and sometimes the reverse. So काला सा may mean either *blackish*, or *very black*, according to the spirit of the context, and the tone of voice with which it is uttered. Very generally, it has no appreciable influence on the sense. When added to a noun, or pronoun, it may either

---

\* With the exception of those mentioned in Chapter III. as being invariable.

inflect it or govern the genitive. In the latter event the sign of the case, as well as the adjunct, varies to agree with the noun with which the comparison is made. Example: बाघ की सी सूरत *a form like a tiger.*

22. There is no peculiar inflection to express the degrees of comparison. The comparative is indicated by making the adjective govern the ablative. Example: यह लड़का उस लड़के से बड़ा है *this boy is bigger than that one.* The superlative (which, in general grammar, is nothing more than a comparative with the word *all* for its complement) is expressed by means of the word सब *all*. Example: यह लड़का सब से बड़ा है *this boy is bigger than all, i. e. the biggest.* An adjective is rendered emphatic, by repeating it, or by prefixing a suitable adverb. Example: बड़ा बड़ा or बहुत बड़ा *very large.*

---

## CHAPTER IX.

### *Syntax of the Pronoun.*

23. A PRONOUN, agreeing with a noun which is not in the nominative, must assume the inflected form. Examples: इस नगर से *from this city*: उन दिनों में *in those days*.

24. The reflective pronoun आप *self*, is invariably the nominal substitute of the nominative to the verb. In such sentences, therefore, as “*I have come from my house,*”—“*bring your book,*”—“*they will lose their way,*” &c. the possessives *my,*

*your*, and *their*, must be expressed by अप्पा, instead of by मेरा, तुम्हारा, and उन का.

25. The relative and correlative generally stand at the commencement of their respective clauses ; and the relative clause takes the precedence. Example : जो तुम चाहोगे सो मैं करूंगा *what you shall choose—that I shall do.*

---

## CHAPTER X.

### *Syntax of the Verb.*

26. THOSE parts of the verb which end in आ, vary that termination according to the gender and number of the word with which they are required to agree ; changing it to ए for the masculine plural, to ई for the feminine singular, and to ई or इयाँ for the feminine plural. When two feminine plurals come together, as in the pluperfect, &c., the last only need take the plural form. Example : रण्डियाँ रोती थीं *the women were weeping.*

27. A transitive verb may govern either the nominative or the accusative. Pronouns, unaccompanied by nouns, are put in the accusative after transitives, unless the pronoun be used in a sort of absolute neuter sense ; as in the sentences, “ when he heard *this*,”—“ he did not see *that*,”—“ *what* I have seen, *that* I shall relate.”

28. A remarkable exception to the common rule, of the verb

agreeing with its nominative, occurs in the case of the past tenses of transitive verbs. The anomaly arises from the operation of the expletive particle ने.\* As the operation of this particle recurs incessantly, it is indispensable that the rules for its application be perfectly understood. The following should be committed to memory :

- (1.) The particle ने must be attached to the agent of every past tense of an active transitive verb. *He - only those used formed from the past participle not*
- (2.) The particle ने, like a postposition, inflects the agent,† unless this be मैं I, or तू thou. *the rule of inflection*
- (3.) If the *object* be put in the nominative, the verb must be made to agree with it.
- (4.) If the object be not a word in the nominative, the verb must be used in the third person masculine singular.

Examples : किसी कुत्ते ने एक हड्डी पाई or हड्डी को पाया *a certain dog found a bone* : जब राजा ने ये सब बातें सुनीं *when the king heard all these words*. Stories frequently commence with the words यूँ सुना है कि, &c. “ *I have thus heard, that,*” &c. Here there is an ellipsis of the pronoun मैं ने ; but the construction applies equally, though the agent, and therefore also the expletive, be not expressed. In the expression quoted, the

\* In *Bhākhā* this particle takes also the form of नि .

† If it be a word capable of inflection.

object of the verb is the story that follows ; and (according to rule 4.) where the object is not “ a word in the nominative,” the verb must be used in the third person masculine singular.

29. Verbs are added to uninflected nouns and adjectives, for the purpose of forming what are termed “ nominal” compound verbs. Example : गाली देना *to abuse* : छोटा कर्ना *to diminish*.

30. In order to give emphasis to a verb, we employ in English an adverb. In Hindī a subordinate verb is used for this purpose. It is subjoined, in all the requisite forms of inflection, to the root of the principal verb. In English, it depends on usage what adverb must be employed to give emphasis to any particular verb ; and in Hindī, the choice of the subordinate verb in an “ intensive” compound, is even more arbitrary. For example, in the compound मार डालना *to kill downright*, the subordinate is a verb signifying *to throw* ; and in खा जाना *to eat up*, the secondary verb signifies *to go*. The appropriate secondary verb (like the appropriate adverb in English) must be learned by practice. In translating *from* Hindī, however, a compound of this description need never puzzle one, if it be recollected that, with two exceptions, no verb governs the *root*, unless for the purpose of giving it some emphasis, which should be rendered in English by an adverbial expression, if there be any occasion (which there is not always) for rendering it at all.

31. The two other verbs, governing the *root*, are सकना *to be able* (forming *potentials*) ; and चुकना *to be finished* (which forms

completives). Examples : मैं जा नहीं सकूंगा *I shall not be able to go* : वह खा चुका है *he has finished eating*.

The verbs लगना *to come in contact* (and hence *to begin*), देना *to give* or *permit*, and पाना *to obtain* or *be allowed*, govern the inflected form of the infinitive. They form “inceptive,” “permissive,” and “acquisitive” compounds. Examples : वह कहने लगा *he began to say* : उस को आने दो *allow him to come* : तुम रहने पाओगे *you will be allowed to remain*.

32. The verbs चाहना *to wish* (hence *to require*, or *to be on the point of*), and कनी *to make* (*a practice of*), govern the past participle, which must not vary from the form of the masculine singular. The first verb forms “desideratives, requisitives, and proximatives ;” the second, “frequentatives.” Examples : वह जाया\* चाहती *she wishes to go* : वे आया कर्ते *they make a practice of coming*.

33. The respectful future or imperative of चाहना, viz. चाहिये very often occurs, idiomatically used with the sense of “*it is requisite*.” It may either govern the past participle, or it may be followed by the conjunction कि, and the aorist of the verb. Example : हम को यहां रहा चाहिये or चाहिये कि हम यहां रहें *it is requisite that we remain here*.

34. A participle referring to the nominative to a verb, instead

---

\* The forms जाया and मरा (from जाना *to go*, and मनी *to die*), are preferred to the more usual forms गया and मूआ in these compounds.

of agreeing with it, is frequently put in the form of the inflected masculine singular. Examples : वुह गते आती *she comes singing* : सौदागर का बेटा नई पोषाकें पहने हुए आया *the merchant's son came, dressed in new clothes*. As the construction may be explained by supposing an ellipsis of the words "in the *state* of one doing so and so," the combination of the verb and participle has been termed a "statistical."

35. The formation of "causal" verbs (though not properly a part of the Syntax) may be here noticed. Causals are generally formed by adding आ or वा to the root, the last syllable of which, if long, is commonly shortened. Example : दिखाना *to show*, from देखना *to see*. Many transitives are formed from intransitives by lengthening the last vowel of the root if short. Example : पालना *to nourish*, from पलना *to be reared*.

---

## CHAPTER XI.

### *Syntax of Particles.*

36. THE simple postpositions का or कौ, के, की *of*, को or कों *to*, से\* *from, by, with*, पर† *upon*, में‡ *in*, and तक or तक *up to*, or as far as, inflect the word which they follow. The rest

---

\* Or से or सौ or सती or तें.

† Or पः or पे.

‡ Or मों or मह or मांहि or माही.

of the postpositions govern the genitive case. These other postpositions, being mostly nouns or participles governed by a simple postposition understood, require the sign के or की, according as they happen to be originally of the masculine or of the feminine gender.

37. The translation of the conjunctive particle कि deserves some attention. The idiom of the language requires that a reported speech or thought should be given, not in the indirect form usual in the languages of Europe, but in the same grammatical form in which the speech was uttered, or the thought presented itself to the mind. For instance, instead of saying “ He told me *that he would come,*” the idiom requires us to say, “ He told me that ‘ *I shall come,*’”—instead of “ He imagined that they would not go,” “ He imagined that ‘ *they will not go.*’”—The clause thus reported is introduced by the particle कि, which is to be rendered by *namely,* or *saying,* or *thinking to himself,* or *as follows,* &c., according to the circumstances of the case.

It has been already mentioned, that points are sometimes written under letters employed to represent certain peculiar sounds of the Persian and Arabic alphabets. In pure *Hindī* these do not occur. A full explanation of them will be found in Shakspear's *Hindustānī* Grammar. It may be sufficient to mention here, that **अ** may stand for ع, **क** for ق, **ख** for خ, **ग** for غ, **ज** for ذ, ز, د, ض, or ظ, **त** for ط, **फ** for ف, **स** for ث or ص, and **ह** for ح.
